

2019  
Plant Biology

XXIII Meeting of the Spanish Society of Plant Physiology | XVI Spanish Portuguese Congress of Plant Physiology

Pamplona  
June 26-28, 2019

I obtained a degree in Biochemistry in 2007 (University of Granada). In 2008 I got a scholarship from the Public University of Navarra for the accomplishment of a Doctoral Thesis in the Agrobiotechnology Institute of Navarra (IdAB) at Carbohydrate Metabolism lab led by Dr. Javier Pozueta. In parallel, in 2009 I obtained a Master degree in Biotechnology (Public University of Navarra). During my Ph.D. I studied the regulation of glycogen metabolism in *Escherichia coli* and the evolution of glycogen genes in enterobacteria. In 2014 after finishing my doctoral period I continued my work at Carbohydrate Metabolism lab as a Postdoc. My current work focuses on the study of the molecular and biochemical mechanisms involved in the response of plants to volatile compounds emitted by diverse microorganisms and specially on the identification of these volatile compounds.
