

2019  
Plant Biology

XXIII Meeting of the Spanish Society of Plant Physiology | XVI Spanish Portuguese Congress of Plant Physiology

Pamplona  
June 26-28, 2019

I studied Management and Organization of Agricultural Companies, and Animal Husbandry and Health at the Agroforestry Integrated Center of Pamplona. My first job opportunity came through the Youth Employment Program of the Spanish National Research Council (CSIC). For two years, I enthusiastically worked as a technician of the Research Support Service of the Institute of Agrobiotechnology of Navarra. In 2018, thanks to Planeta STEM-Navarra's Government and CSIC, I participated in the International Genetically Engineered Machine (iGEM) Competition as coordinator of a team of high school students to develop the "Biogalaxy" project. The results were presented in the Giant Jamboree in Boston and the team received the award for the best "Plant Synthetic Biology" project.
